A Asalm of Chanksgiving

"Make a joyful noise unto the Lord, all ye lands. Serve the Lord with gladness; come before His presence with singing. Know ye that the Lord He is God; it is He that has made us and not we ourselves: we are His people, and the sheep of His pasture. Enter into His gates with thanksgiving, and into His courts with praise: be thankful unto Him, and bless His name. For the Lord is good; His mercy is everlasting; and His truth endureth to all generations."

-Psalm 100.

YOU ARE INVITED

The city-wide Thanksgiving service at the Public Auditorium will be sponsored again this year by the Hi-Y council under the chairmanship of Ward Robinson. This annual affair, which was attended by 3000 people last year, will again feature a thousand voice choir of elementary school children under the leadership of Karl Ernst. The program and arrangements for this city-wide event is a demonstration of "Youth at Work."

DO YOU KNOW??

That group life insurance is one of the simplest forms of pure life insurance? Each insured employee holds a certificiate representing his share of the group policy.

That the company pays a share and the employee pays a share? In-

Give them your support by including this in your plans for Thanksgiving observance. Time-10:30 a. m., November 28; place-Public Auditorium. sured employees pay 50 cents a month for a \$1000 policy. This is deducted from the paycheck following the fifteenth of the month.

That general and office employees can carry \$1000 and foreman can carry \$2000?

What is required to get it? First, it is voluntary on the part of ployees. If an employee signs when he is employed, it becomes effective automatically on the second of the month following six months of

Too Soon Or Too Long

EDITORIAL

By RALPH E. KLEIS

There are two great hazards in the life of every man, one or the other of which is inevitable. Either he dies too soon or

he lives too long. Naturally, dying too soon is not desired, while living as long as possi-ble is sought for. But both present financial hazards. He may die too soon, before he accumulated sufficient savings to replace that portion of his income which is needed by those dependent upon him. Or if he lives too long, he may become unable to support himself and his dependents.

Both of these contingencies are met to a limited degree by the Federal Social Security act, which is applicable to

Ralph E. Klein

wage earners and operates under certain conditions. Generally it provides a minimum income to a man's dependents when he dies, or it will provide a basic income to him and his dependents when he reaches age 65. The amount of income in both cases depends upon the period worked, the amount of wages earned and the type of dependents, and ranges from a minimum monthly benefit of \$10 to the maximum of \$85, according to a prescribed formula. Any person can determine his own probable benefits.

Thus knowing what the government provides automatically, a man will usually find that supplementary income shall be needed. Again both contingencies can be met by life insurance. Basically, the ordinary life insurance policy, which is the most common type of life insurance, is a combination of straight term insurance and a savings account. The straight insurance is protection against the first hazard of dying too soon, while the savings account is the means for providing protection against living too long. A proper combination of insurance and savings to fit the needs resulting from each hazard should supplement the expected income from Social Security. The responsibility for adding to the automatic Social Security protection rests with each individual Security protection rests with each individual.

Benefits of life insurance are truly a bargain if a man dies too soon. If he does not die too soon, the added cost is cer-tainly worth staying alive, and the second hazard is provided for at the same time. The protection against both of the inevitable hazards should be considered now, for when the benefits are needed, it is too late.

"Follow the Birds to Victoria"

This popular phrase is probably more familiar to many of us than any of the other advertising phrases which the various tourist around the country use, because it is so close to home. Just 250 miles to drive and a short ferry ride and there you are in the land of birds, bees and flowers and "stuff like that there."

One thing that has bothered me for some time has been what kind of birds you are supposed to follow. What if you got under a flock of

sparrows and ended up in Capistrano, or if your weather eye caught onto a mess of geese and you landed in geeseland, or if by chance you started out after a flock of gooses-oh well, maybe I'd better turn back now and follow the birds to Victoria.

To make a long story short, we followed the birds to Victoria a few weeks ago, but they were definitely love birds this trip-in the form of Mr. and Mrs. Wayne Strong, who were on their belated honeymoon. Due to war restricted travel, they had to delay this glorious trip for several years. The IRON MAN, always on the job to bring you a play-by-play description of every notable event,
